

Do you dread those car tax, insurance and repair bills?  
Would you like to reduce the paperwork of car owning?  
Do you wish your car costs were predictable?  
Do you wish you had the use of a newer car?  
Would you like to save on motoring costs?

If your answer to any of these questions is YES, then you may be interested in STREET FLEET.

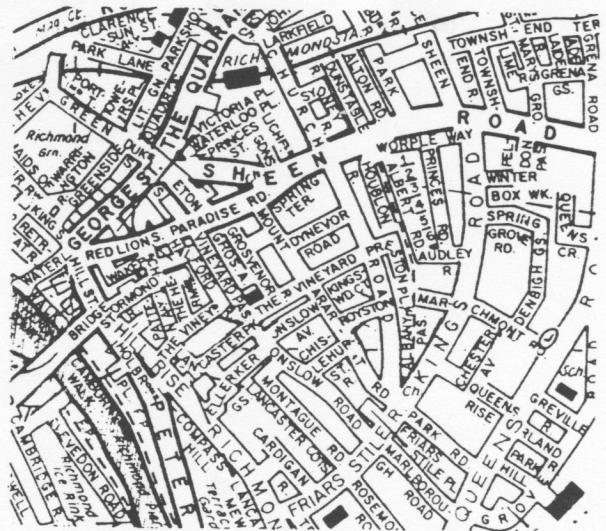

# Street Fleet

An opportunity for residents of RICHMOND HILL

STREET FLEET is a new type of car fleet which provides a convenient, flexible and economic alternative to car ownership.

You may already have read in the local press that a trial scheme in the Richmond Hill neighbourhood is planned to start later this year. Street Fleet will be set up by South Bank Polytechnic researchers, with the backing of the London Borough of Richmond upon Thames.

This leaflet describes how STREET FLEET will work and how it can benefit those who join in the scheme and the whole community. The trial scheme will be set up in the area whose residents express the most interest in joining.

By completing and returning the questionnaire, using the FREEPOST facility, you can register your interest in the scheme, and any comments you may have, without any obligation whatsoever. In return we will send you an accurate assessment of your current car costs, and keep you informed about STREET FLEET.
